Progress to Exhibit at Tech Week 2019, Germany's Largest Disruptive Technology Event

November 7, 2019

Progress to demonstrate how Ipswitch WhatsUp Gold and Ipswitch MOVEit can make network monitoring and data sharing safer on-premises and in the cloud

BEDFORD, Mass., Nov. 07, 2019—Progress (NASDAQ: PRGS), the leading provider of application development and digital experience technologies, today announced that it will be exhibiting at Tech Week, Germany's largest disruptive technology event. The event takes place Nov. 13-14, 2019 at Messe Frankfurt, Frankfurt am Main, Germany.

Held in Germany's data, finance and security hub, Tech Week brings together Cloud Expo Europe, DevOps Live, Cloud & Cyber Security Expo, Smart IoT, Big Data World, Blockchain Technology World and Data Centre World in a single location.

Progress and its partner treeConsult will demonstrate the award-winning Ipswitch® WhatsUp® Gold network monitoring solution and Ipswitch® MOVEit® secure managed file transfer solution under the theme, "Make the Networked World a Safer Place to Share Data" in Booth 775. Event attendees will have the opportunity to meet with Progress and treeConsult representatives and learn more about current trends in the network monitoring and data sharing market as well as best practices for leveraging the right technology to help keep information safe on-premises and in the cloud.

Event: Tech Week
Dates: Nov. 13-14, 2019
Topic: Make the Networked World a Safer Place to Share Data
Progress and treeConsult Booth: #775
Venue: Messe Frankfurt, Ludwig-Erhard-Anlage 1, 60327, Frankfurt am Main, Germany

MOVEit secure managed file transfer software is used by thousands of organizations around the world to provide complete visibility and control over file transfer activities. It's designed to ensure the reliability of core business processes and the secure and compliant transfer of sensitive data between partners, customers, users and systems.

WhatsUp Gold is a network monitoring solution providing coverage from the network edge to the cloud. It enables organizations to see developing issues before users report them and troubleshoot faster from an interactive topology map that shows connectivity and dependencies.
