Richard (Rick) Reidy is the president and chief executive officer (CEO) of Progress Software Corporation. Reidy is responsible for the strategic direction and day-to-day operations of Progress Software. Reidy joined Progress Software as one of the original developers of the Progress® OpenEdge® application development platform. He has held numerous technical and management positions and served for several years as vice president of product development for the company's existing and new high growth product lines. Reidy also served two years in Europe where he helped build the Progress Software network of distributors in Europe and the Middle East.
