Progress Launches Next Generation of Modulus Public and Modulus Enterprise

New offerings bring developers dedicated, compliance-ready environment for Node.js applications

BEDFORD, Mass.--(BUSINESS WIRE)-- [Progress](#) (NASDAQ: PRGS) announced today the next generation of Modulus™, the premier Node.js platform for easily hosting, deploying, scaling and monitoring data-intensive, real-time Applications. The new Modulus offering allows developers to get to market faster, and enjoy greater flexibility, simplicity, and ease-of-use - with immediate access to the same powerful features from entry-level on up.

Modulus Public Cloud offerings are available in three servo sizes - 396MB, 512MB, and 1024MB - based on project resource needs and to fill hosting needs cost-effectively. With additional tiers of deployment support, each is designed to scale the user's environment as apps and business grows.

The Modulus Enterprise offering helps organizations conquer major deployment challenges. Users can launch across multiple servers, environments, and geographies, while meeting evolving compliance standards such as PCI and HIPAA. The Modulus Enterprise offering is purpose-built for hybrid infrastructure environments as well as a platform-as-a-service (PaaS) model behind the firewall.

Quotes:

Steve Mandery, CEO of ThinkU, creators of Pillow Pets World: "The Modulus offering provided us with the ideal solution to meet speed, security and scalability needs for deploying our latest offerings. In the fast-paced world of children's entertainment, we need to be ready to capitalize on great ideas by getting them in front of consumers quickly and not be held back by scalability issues. Modulus Enterprise Class enables us to do that successfully."

Charlie Key, co-founder of Modulus: "We continue to enhance the Modulus offering, and this latest release gives Node.js developers a cutting edge deployment platform, with enhanced features and functionality from the get-go, for a fraction of the price of our competitors. This release is also exciting in that it builds on our recent launch of our mobile app for iOS devices. There's a lot of great excitement and momentum around the Modulus offering right now."
