## **Progress Software to Host the Third of a Three Part SOA Management Webinar Series**

Julianna Cammarano to discuss "Visibility and Tracking for Critical Applications - Optimize Application Performance and Increase Revenue"

Bedford, Ma - May 5, 2008 - Progress Software Corporation (NASDAQ: PRGS), a leading provider of application infrastructure software to develop, deploy, integrate and manage business applications, has announced that Progress Software will host a three part SOA Management webinar series. The third session, hosted by Progress Software's Julianna Cammarano, Sr. product marketing manager, will be held on May 6th, at 11:00 EST and is entitled "Visibility and Tracking for Critical Applications - Optimize Application Performance and Increase Revenue".

- | When: Tuesday, May 6th, 2008 at 11:00am EST
- | Where: [To Register Click Here](#)
- | What: As enterprises increase their level of SOA adoption and incorporate mission-critical applications into the portfolio of systems being serviced by this infrastructure, the quality of service delivered becomes paramount. Fortunately, you can now control and ensure QoS--by applying Web services and SOA management. This can provide end-to-end visibility into the QoS companies deliver to customers--enabling them to measure, control and secure all the moving parts that mission-critical applications depend on.
- | Why: Studies show that Service Orientated Architecture (SOA) is used in more than 50% of new mission-critical applications and business processes and by 2010 this level will increase to 80%. With this rate of proliferation throughout the enterprise and the underlying importance of service reliability to these applications, businesses are now including Web service and SOA management and governance as top priorities.
